

What is a **Glazier?**

Glaziers/Structural glass tradespeople cut, fit and install glass in windows, skylights and display units or fit to prepared surfaces such as interior walls. This can be done in a factory if fitting glass into prefabricated products or on site in the case of new construction or repair.

What does the **job** involve?

- **Read** plans and specifications
- **Cut, drill and notch** holes in glass with diamond-tipped cutters and drills
- **Assemble and secure** parts of pre-made glass units such as shop fittings and shower enclosures
- **Install** metal window and door frames into which glass panels are fitted like shower screens and sliding doors
- **Fit** glass
- **Make** decorative edges on glass and mirrors

How do I get into **this career?**

The most common pathway is via an apprenticeship. However, a Glazier can start as a Trade Assistant or Labourer, then, after a few years, have their skills assessed through a process called Recognition of Prior Learning (RPL) to obtain the trade qualification.

What **training** should I do?
